1. The following [ ] was sent [ ] on 19 October 1950:

25X1

"On 17 October 1950 at 10 a.m. the former block station at Lindthal on the Falkenberg/Elster-Cottbus line started operating as a crossing station. With regard to operations and personnel matters Lindthal is assigned to the Finsterwalde railroad station. " \*

25X1

- \* [ ] Comment. Lindthal is located 6 km northeast of Finsterwalde on the Falkenberg-Dobrilugk/Kirchhain-Calau-Cottbus railroad line, which is an important eastwest route. The second track of this line has been dismantled by the Soviets. After the construction of one or several passing sidings the Lindthal block station was converted into a crossing station. This will raise the efficiency of the single-track line. The reconstruction of the second track on the entire line is envisaged in the new five-year plan, which runs from 1951 to 1956. [ ]
